accountability

about us

Gas Group is a consortium of leading energy companies providing world class services focusing on creating solution with an absolute safety, quality and integrity in the oil and gas sector in Africa. The group is comprised of the following companies:

- Gulf Stream Exploration
- First Atlantic Drilling
- South West Designs
- Black & Vetch
- Delta Logistics

about us

An aspiring global energy market player, Gas Group is a dynamic growing business with operations in more than 5 countries over four continents.

While our headquarters are in Nigeria, over 60% of the talented professionals who make up the Gas group Team are located outside Nigeria.

We are proud in creating niche as an emerging group in emerging economy. Gas group is creating history as the first Africa group to commence a design of a mega African gas fractionation plant, we are also majoring in all aspects of the energy sector, particularly natural gas, where we have experience across the entire gas chain – from exploration to delivery to the consumer.

Gas group is a Nigerian American Joint Venture. Joint owned by BV Nigeria, Loadcraft Industries and French core investors in Natural Gas.

Our business strategy

Our focus is on understanding, building and supplying natural gas markets around Africa and the world. We operate in four key business sectors – Exploration and Production, Fractionation, Power, oil and Gas services.

Our high performing Fractionation business remains the centre of gravity of our activities. The increasingly opportunity-rich Natural Gas (LNG) segment, together with Transmission and Distribution and Power form our downstream activities and give us the complete range of skills across the gas chain.

Our Business

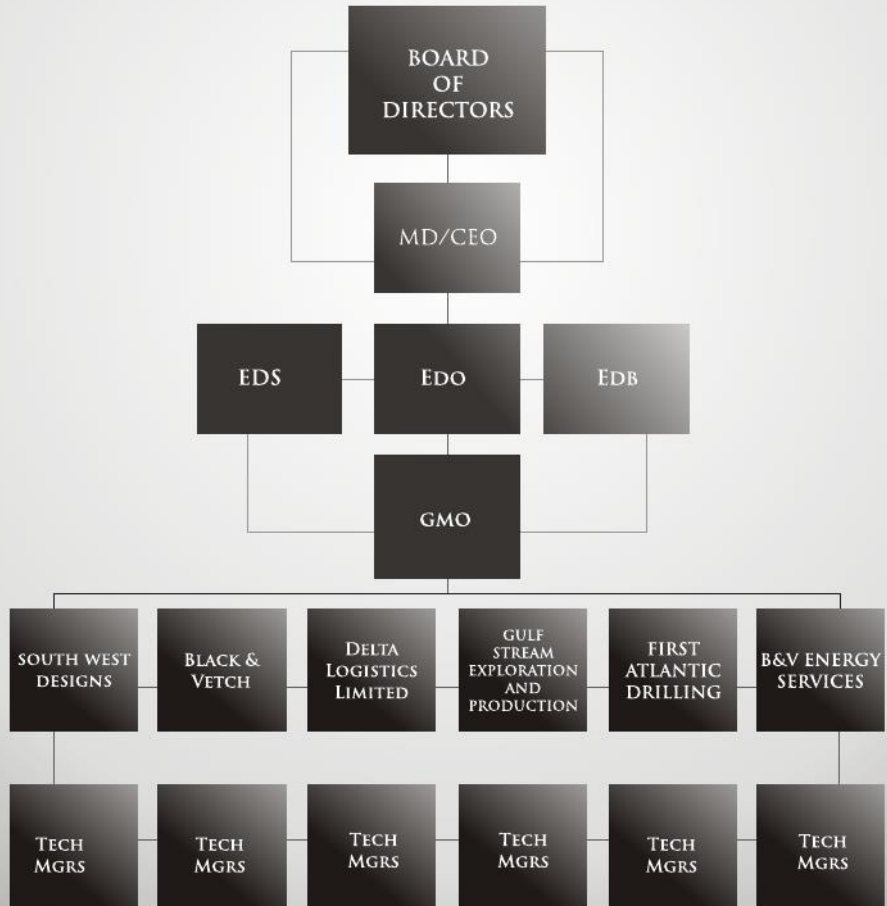

Our business is the discovery, extraction, fractionation, transmission, distribution and supply of propane, Ethane, Butane and other gas extracts to existing and developing markets in Africa and around the world.

The demand for gas is projected to grow over the next decade outstripping the growth in demand for other major sources of energy. With an escalation of liberalisation in the large, more mature markets and the vast unmet demand for energy in the developing economies, we - with our expertise in natural gas - will be rich in opportunities.

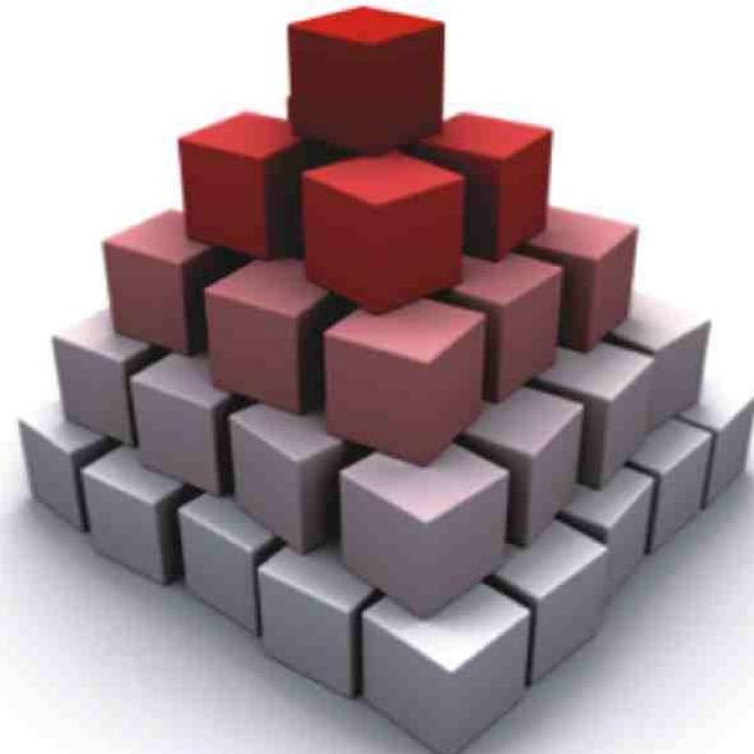

The heightened awareness of environmental degradation throughout the world now favours natural gas as the fossil fuel of choice. As a fossil fuel, gas is clean and abundant and with the application of our core skills, it can be affordable.

DELTA LOGISTICS LIMITED

Delta Logistics is a Nigerian Corporation in strategic alliance with Delta Logistics of the Carribeans Established in 1982 by its Owner John Walker, Delta Logistics Limited has become the premier marine contracting and consulting company in the Caribbean. We at Delta Nigeria are dedicated at providing solutions for energy companies, which are engaged in offshore exploration and production activity.

Area of specialization:

- Logistics Support
- Offshore supply
- Standby Services
- Tug & Barge Services
- Oil Spill Response & Environmental Services
- Marine Transportation
- Offshore Crewing
- Salvage and Rescue
- Diving Services and Dive Chamber Operation
- Remotely Operated Vehicles
- Offshore Facilities Maintenance

BLACK & VETCH

Black & Veatch is incorporated in Nigeria as Black & Veatch without the relationship of Black & Veatch USA. We intend to Key into their expertise to develop power expertise within Nigeria and west African region. We plan a leading african power consulting and construction company with the mission of Building a World of Difference. By advancing the frontiers of knowledge, we provide our clients with reliable solutions to their most complex challenges, thereby helping improve and sustain the quality of life around the world.

Area of specialization in Infrastructural Development

- Asset Management
- Climate Change Solutions
- Construction
- Design – Build/EPC
- Engineering Consulting
- Engineering & Design
- Infrastructure Planning
- Management Consulting
- Procurement
- Program management
- SAP Services
- Smart Utility
- Water Spares

GASGROUP NEW BUSINESSES

GASGRUPPAL LNG LIMITED (GASGROUP)
GIP LTD

GASGRUPPAL GREEN INDUSTRIAL PARK LTD
GGIP

GASGRUPPAL GREEN INDUSTRIAL PARK LTD GGIP

This is GGIP's a solution to increasing the local competitiveness through what it provides – institutional framework, modern services in administration, financial consultancy, training, technical guidance, information services, shared facilities, research and own infrastructure designed to meet the needs of companies they gather by providing them with modern services for the business deployment and development.

A concentration of a variety of activities and services to support the industry will influence investors' decision to switch to the region.

GGIP will provide a favorable environment for the development of concentrated firms but also for the local development.

GASGRUPPAL GREEN INDUSTRIAL PARK LTD

GGIP

GGIP will create over 100,000 direct and indirect jobs and would contribute significantly to the country's manufacturing sector.

GGIP will help achieve economic growth and diversify our economy, It would not only lead to job creation but bring down the cost of goods and services in the state and country at large, change the face of the Nigerian economy and unleash its industrial potential.

GASGRUPPAL GREEN INDUSTRIAL PARK LTD GGIP will support the local development which will be measured in the number of jobs creation, income generation by local institutions paying taxes and duties from firms benefiting from the infrastructure made available through their involvement in attracting investors; the more productive the industry and more efficient the production, the higher the company's results and therefore the benefits.

GGIP's benefits

- Increase the amount of foreign direct investment;
- create and develop high technology industries;
- Develop activities that ensures the hiring of highly qualified staff;
- increase the capacity to meet the needs of the domestic market,
- expand exports and reduce imports of industrial products;
- produce competitive goods and services for domestic and overseas markets;
- Conduct activities in accordance with the regional development objectives.

GASGRUPPAL LNG LIMITED (GASGROUP) GLNG LTD

GLNG will help Federal Government Master Plan to promote the use of LPG inside the country, especially for areas not connected to the distribution of Natural Gas.

Gas consumption across Africa is on the upswing with Lagos in particular because of its increasing population and rising income, which creates avenue for potential and existing players in the industry to expand within the local economy, the West African region and the African continent as a whole

Our LPG distribution outlet is set to become the leading LPG business in the whole of Lagos State and other cities where our chains of LPG Outlets will be located hence the need for us to build a solid business foundation and business structure that will enable us achieve our aims and objectives.

Excellent customer service and efficiency are top priority to us.

Significant percentage of the Nigerian population depends on liquefied petroleum gas for their cooking and other domestic uses. Furthermore, industries, government parastatals, hospitality establishments, hospitals, Fast food industry, restaurants, bakeries, and so forth, all make use of gas for commercial and business purposes. However, there is room for further investments and expansion to ensure significant penetration of untapped and underserved markets in Nigeria.
